

Method framework: v5 vs. compact v6

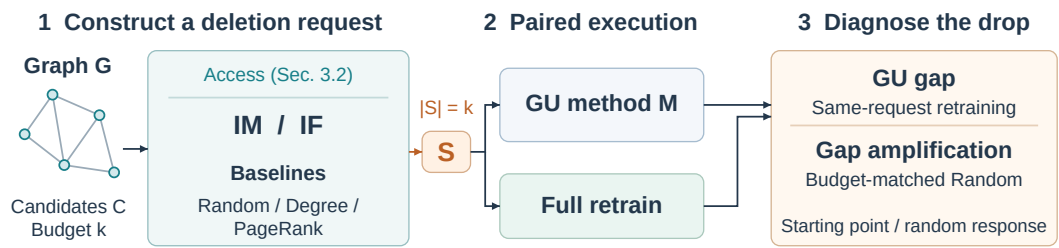

Both figures use the same 396 pt width (ICLR manuscript text width).

v5 | original layout

Height: 152.0 pt | Smallest original label: 4.3 pt

v6 | compact candidate

Height: 99.0 pt | Smallest label: 6.9 pt

35% less height at the same width.

Access is an inline reference; trained-model icons are removed.

The same request still branches to GU and full retraining.

Diagnosis labels follow the current Section 4.3 draft.

The original v5 and the current manuscript are preserved.
