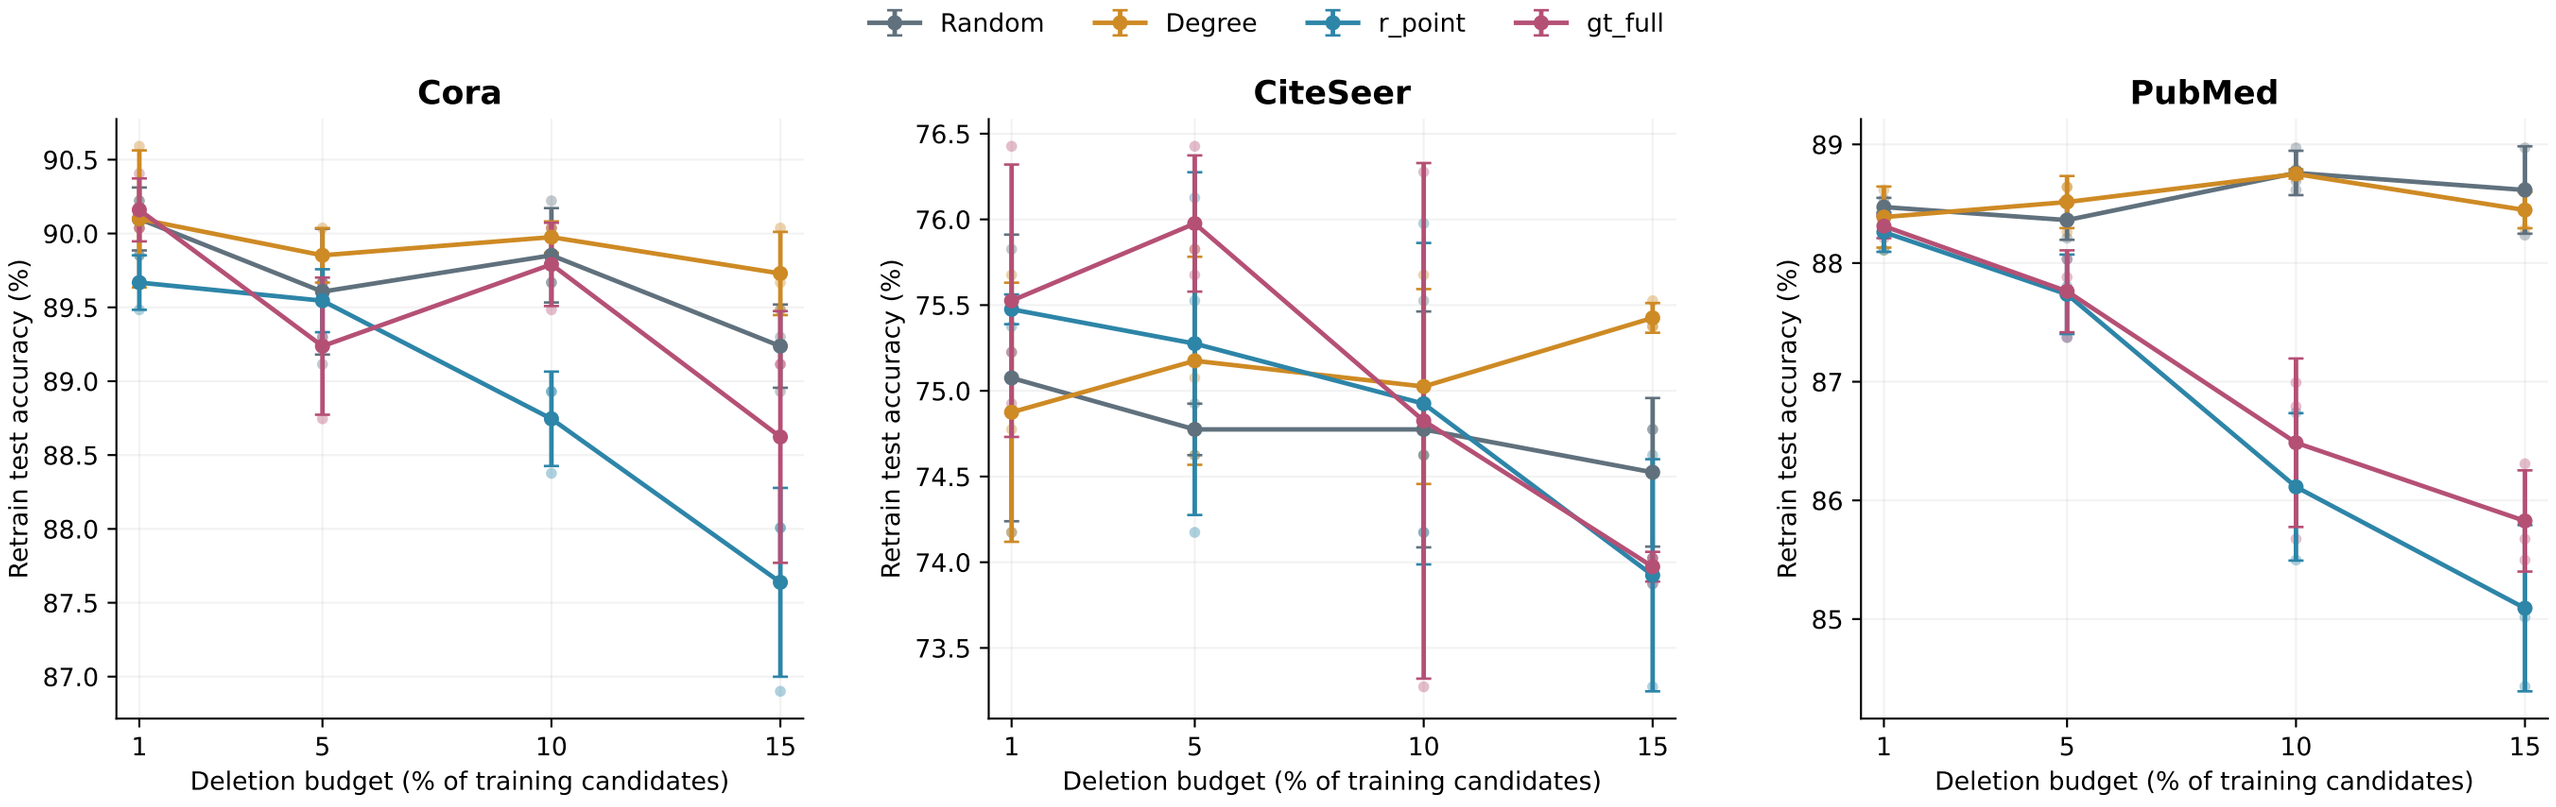
EXP-032: retraining response across deletion budgets

Current recovery run only | Retrain only | No GU or Original / 0% endpoint



Means +/- sample SD across 3 training seeds (42, 212, 2024); faint dots show individual seeds. SD is not a confidence interval.
Four fixed display selectors; all 10 are in the CSV. Lines join measured budgets; panel y-scales differ. Stored f1 = accuracy / micro-F1.
